skin brightening and ingrown treatment kit

professional treatment protocol

professional use only

Please read all instructions and precautions before beginning treatment.

ABOUT THE TREATMENT

The KAZ PRO Brightening Treatment utilizes Alpha Hydroxy Acids (AHAs) and Beta Hydroxy Acids (BHAs) to help reduce hyperpigmentation, prevent ingrown hairs, minimize breakouts, and promote smoother, brighter-looking skin on the entire body.

Benefits

brightens skin

helps reduce hyperpigmentation

prevents ingrown hairs

minimizes breakouts

PRODUCTS INCLUDED IN THE KIT

- 1 Brightening Peeling Pads
- 2 Clarifying Peel
- 3 Clarifying Peel Intense
- 4 The Balm

Optional product
Kaz Prep & Purify Foam

PROFESSIONAL TREATMENT PROTOCOL

TIP

Consistency matters more than intensity. Gentle, regular treatments provide safer and more effective long-term results than aggressive exfoliation routines.

Recommended treatment schedule

Use: KAZ PRO Claryfying peel for Sensitive skin
KAZ PRO Clarifying Peel Intense for Normal and Oily/Ingrown-prone skin

Skin Type	Weeks 1-2	Weeks 3-6	Maintenance
Sensitive	Once per week	1-2 times / week (3-4 days apart if tolerated)	Once weekly
Normal	Twice per week (3-4 days apart)	2-3 times / week	Twice weekly
Oily / Ingrown-prone	Twice per week	Every other day (maximum 3 times weekly)	2-3 times weekly

For most users, 2 treatments per week is the ideal balance between brightening and ingrown hair prevention, followed by monthly maintenance treatments and a consistent home-care routine to help maintain clear, smooth, healthy-looking skin.

PRECAUTIONS

Use after waxing

- Immediately after waxing: use only soothing, non-exfoliating products.
- Wait at least 24 hours before using a this AHA/BHA treatment. Do not peel if your skin is no longer red, tender, or irritated.
- If you have sensitive skin or are waxing the face, 48–72 hours is often an even safer interval.

Patch test

Before the first treatment, perform a patch test 24–48 hours prior to full application, especially if the client has never used products containing Alpha Hydroxy Acids or Beta Hydroxy Acids.

Do not use if:

- You are allergic to salicylates (aspirin allergy).
- You have active eczema, dermatitis, inflammation, or open wounds in the treatment area.
- Your skin barrier is severely compromised.
- You are sunburned.
- You are currently using retinoids or have used isotretinoin within the last 6 months.

Consult a physician before use if:

- You are pregnant or breastfeeding.
- You are taking medications that increase photosensitivity.
- You have a history of severe skin sensitivity or post-inflammatory hyperpigmentation.

Use extra caution if:

- You have sensitive skin.
- You are using retinoids (tretinoin, adapalene, or tazarotene).
- You are using other exfoliating acids.
- You are prone to post-inflammatory hyperpigmentation.

Discontinue use and seek medical advice if:

- Severe burning develops.
- Blistering occurs.
- Significant swelling develops.
- Persistent redness lasts more than several days.
- Signs of infection appear.

KAZ PRO CLARIFYING PEEL TREATMENT SENSITIVE SKIN

- 1 Cleanse the treatment area with KAZ Prep & Purify Foam, then rinse thoroughly.
- 2 Prepare the treatment area with KAZ Brightening Peeling Pads.
- 3 Protect all mucous membranes (lips, nostrils, corners of the eyes) with KAZ Pro Balm.
- 4 Apply a thin, even layer of KAZ Clarifying Peel, using light, even strokes with a small cotton pad.
- 5 Leave on for 3-5 minutes, depending on the client's skin type and treatment area.
- 6 Rinse thoroughly with cool water.

- 7 If excessive burning occurs, immediately remove the peel and neutralize with Kaz Prep & Purify Foam. Mild tingling is normal. Rinse thoroughly using soft cotton pads.
- 8 Apply a thin layer of KAZ Pro Balm to protect the skin and reduce friction in areas prone to rubbing. Do not apply Kaz Balm to oily areas of the face.

KAZ PRO CLARIFYING PEEL INTENSE TREATMENT NORMAL AND OILY SKIN

- 1 Cleanse the treatment area with KAZ Prep & Purify Foam and rinse thoroughly.
- 2 Prepare the treatment area with Kaz Brightening Peeling Pads.
- 3 Protect all mucous membranes (lips, nostrils, corners of the eyes) with Kaz Pro Balm.
- 4 Apply a thin, even layer of Kaz Clarifying Peel Intense using light, even strokes with a small cotton pad.
- 5 Leave on for 5-8 minutes, depending on the skin type and treatment area.
- 6 If the tingling is minimal, apply a second layer of peel to resistant or heavily pigmented areas.
- 7 Rinse thoroughly with cool water.
- 8 If excessive burning occurs, immediately remove the peel and neutralize it with Kaz Prep & Purify Foam. Mild tingling is normal. Rinse thoroughly using soft cotton pads.
- 9 Apply a thin layer of Kaz Balm to help protect skin and reduce friction in areas prone to rubbing. Do not apply Kaz Balm to oily areas of the face.

ADJUSTING THE PROTOCOL

Evaluate the skin's response after each treatment and gradually increase the contact time as tolerated. If additional exfoliation is desired and no adverse reactions occurred after the first treatment, progress to Clarifying Peel Intense.

For enhanced exfoliation, a physical preparation step may be performed using the **KAZ PRO Exfoliating Mini Glove** and **KAZ PRO Oil**. Completely remove all oil residue before applying the peel.

Clients with very sensitive skin may continue using **Clarifying Peel** throughout the treatment series instead of progressing to **Clarifying Peel Intense**.

POST-TREATMENT CARE

- Avoid direct sun exposure and always apply SPF 30 or higher to exposed treated areas.
- Avoid hot baths, saunas, steam rooms, swimming pools, and excessive sweating for 24 hours.
- Do not use retinoids, scrubs, or other exfoliating products for 3–5 days after treatment.
- Keep the skin moisturized and avoid picking or scratching the treated area.
- Mild redness and flaking may occur and are a normal part of the renewal process.
- Consistent home care is essential for maintaining results and minimizing ingrown hairs.

RECOMMENDED PRODUCTS FOR HOME CARE:

Kaz Intimate Hair and Skin Oil 1 fl oz / 30 ml

Kaz Exfoliating Mini Glove 4 pack

Kaz Dual Side Face Pads 3" x 3", 60 pcs

Kaz Ingrown Hair Exfoliating Sugar Scrub Bare (Fragrance Free) 8 fl oz / 236 ml

Thank you for choosing
